# Intelligent Automation Incorporated

## Enhancements for a Dynamic Data Warehousing and Mining System for Large-scale HSCB Data

### Monthly Report No. 5

Reporting Period: July 20, 2016 – Aug 19, 2016

Contract No. N00014-16-P-3014

*Sponsored by*  
ONR, Arlington VA  
COTR/TPOC: Dr. Rebecca Goolsby

Prepared by  
Onur Savas, Ph.D.

### DISTRIBUTION A

Approved for public release; distribution is unlimited.

## Monthly Report No. 5

# Enhancements for a Dynamic Data Warehousing and Mining System Large-Scale HSCB Data

Submitted in accordance with requirements of  
Contract #N00014-16-P-3014

Performance period: July 20, 2016 to Aug 19, 2016  
(PI: Dr. Onur Savas, 301.294.4241, osavas@i-a-i.com)

## 1 Work Performed within This Reporting Period

In this reporting period, we performed the following tasks.

- **Developed VK Data Collection and Basic Statistics Computation Capabilities.** We have developed a capability to retrieve VK posts based on keywords and geospatial locations. We have also developed a capability to compute basic statistics of the VK posts that include computation of top users, top words, top URLs, and top attachments along with top popular media. These capabilities are integrated into Scraawl.
- **Released Scraawl 1.18.0**

### 1.1 VK Data Collection

VK is the largest European online social networking service. It is available in several languages, but is especially popular among Russian-speaking users [1]. Similar to other social networks, VK allows users to message each other publicly or privately, to create groups, public pages and events, share and tag images, audio and video, and to play browser-based games [1].

In this reporting period, we have matured VK crawling capabilities. In particular, we have developed a capability to retrieve VK posts based on keywords. Current search grammar includes combining a set of keywords by AND'ing or OR'ing them. The search can be performed as streaming or a 1-week historical, and can be combined with a geo-

location search. The search is integrated as part of Scraawl, and the UI is shown in Figure 1. Similar to other social network searches, the keywords or phrases can be entered separately, a report name can be given to the search, and either a streaming or a historical search can be chosen. In addition, a map is interactively used (not shown) to restrict the search to a geospatial region.

The screenshot displays the VK Search interface. At the top, under 'Data sources', there are radio buttons for Twitter, Instagram, Tumblr, YouTube, News Feeds (Disabled), and VK (selected). Below this is the 'Search keywords' section with a text input containing 'rio2016 x olympics x rio x'. A note below the input states: 'Separate keywords with commas to match multiple keywords (e.g. vk, socialmedia). Uses managed VK API, quota limits apply.' The 'Report name' section has an empty text input. The 'Search timeline' section has radio buttons for 'Streaming' and 'Recent' (selected), with a date range from '2016-08-19 15:49' to '2016-08-26 15:49' and a label 'Time range for recent search'. The 'Report limit' section features a slider bar with a red marker at 500, and text indicating 'Current limit: 500 - Total quota left in August, 2016: 45,542'. Below the slider is a note: 'Sets the limit for the number of posts in the report'. At the bottom, there is a button labeled 'Start Scraawling'.

**Figure 1: Representative VK Search Screen.**

## 1.2 VK Basic Statistics

We have also developed capabilities to compute basic statistics of the VK posts that were collected using the interface of Figure 1. In particular, top users, top words, top URLs, and top attachments along with top popular media is computed and presented to the user in one screen as shown in Figure 2. The timeline of the posts (not shown) is also presented in the same screen. Each top statistics (e.g., top words) can be further drilled down to show additional information.

## Basic Statistics

Basic Statistics

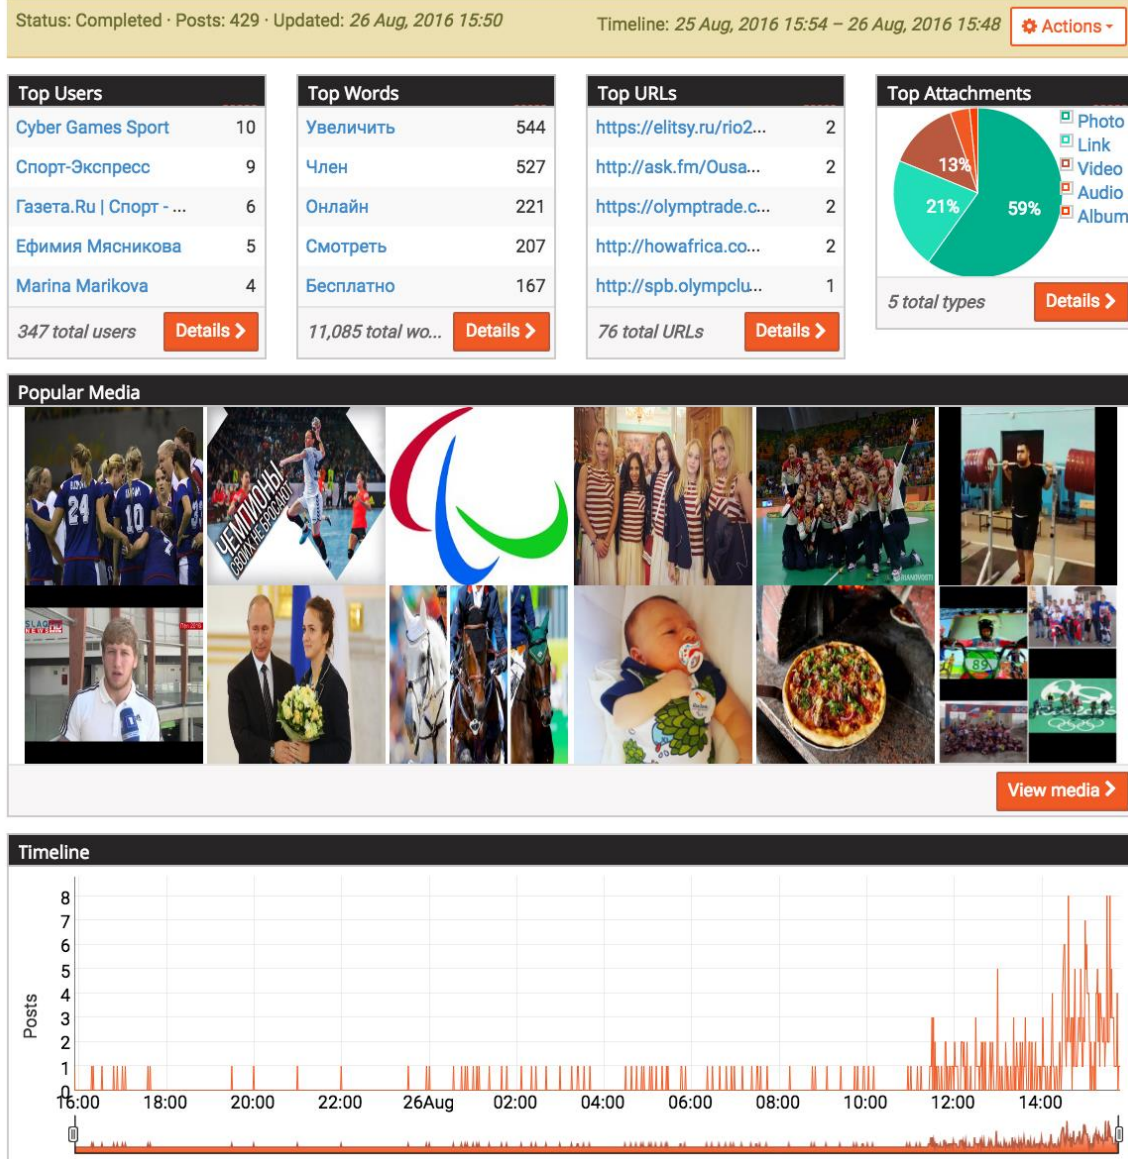

Figure 2: Representative VK Basic Statistics View.

## 2 Current Problems

None.

## 3 Work to be Performed in the Next Reporting Period

In the next report period, we will focus on the following tasks:

- We will deliver Scraawl 2.0.
